

“Taking Predictions to the Next Level: Expanding Beyond Today's Weather, Water, and Climate Forecasting and Projections”

Why Should You be at the 93rd Annual Meeting?

Austin welcomes you to enjoy a wide variety of live music, & authentic, Texas-style food.

Unusual suspects—not only all your old friends from previous meetings but also new ones from the water, ocean, coastal & ecological communities—they'll ALL be there!

Share your amazing stories of your experiences with extreme weather and climate in 2012.

Tremendous amount of weather, water, ocean and climate experts to listen and talk to—and employers that can hire you!

Indulge your inner geek: Join with other scientists & other professionals to celebrate new discoveries & advancements in their fields.

New events & opportunities for students and early career professionals...come join us!

Whether you're a student, teacher, scientist, or a hobbyist, the AMS Annual Meeting will have something for you!

The meeting will be jam-packed with events all week, including Weatherfest, Short Courses, A Student Conference, the First Early Career Professionals Conference, and 34 other conferences for you to explore. The theme, “Taking Predictions to the Next Level: Expanding Beyond Today's Weather, Water, and Climate Forecasting and Projections”, will be expressed through over 30 theme joint sessions throughout the conference.

Abstract submissions are encouraged and due August 1, 2012. Visit annual.ametsoc.org (or scan the QR code) for all the details!
