</tbody>
</table>

Because there are 11 sessions on Mon., Tues., and Thur. available for these talks (Wed. is omitted owing to the Observational Symposium that day), we will do our best to avoid having more than one Core Science Keynote schedule at the same time. If there are more than 11 Keynote talks, we would need to schedule two (but not more) Core Science Keynote talks simultaneously. Similarly, we propose to minimize overlap among the various themed joint sessions on greatest observational needs.
